“Packaging for Every Necessity”

New Innovations in Packaging, Your Quality Guarantee

Protecting objects of value is not just a question of basic logic.

It's an instinct.

Especially in the case of things that are sensitive and delicate.

And that need to pass through many hands in order to reach their destination...

... **your table.**

Prepared for every eventuality

The protection of our products is, and always has been an essential issue for Frutas Montosa.

Day after day we work hard in order to ensure avocados that are fresh and perfectly ripe, thanks to two key elements...

...The product presentation and packaging.

Ready to Serve

The container of any product is its own "business card".

So the packaging process is truly a very special moment.

That's when we guarantee the safety, quality and convenience of our customers.

And since none of our customers are completely alike...

... Neither are our products.

That's why we take care of each detail of our packaging...

...thinking of a special container for each and every moment.

.... And for each and every customer.

With such variety, which do you prefer?
